

12-DAY NEW ZEALAND MULTI-ISLAND EXPLORER

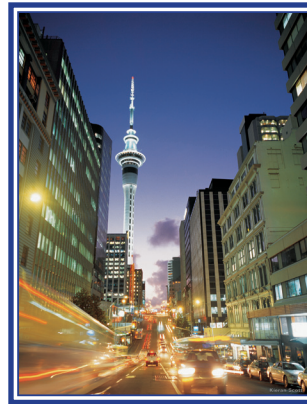

**E.S.I.
TOURS**

New Zealand, known as the youngest country on earth, is the last land mass to be discovered. The first inhabitants are the Maoris who migrated from the Polynesian Islands. Follow by extensive European migration in the mid-19th century and Asian and Pacific Islanders in the 20th century, help shape New Zealand into a vibrant and diverse multi-cultural society. It is also known for its natural beauty with stunning landscapes, lush vegetation and unique wildlife. The country is comprised of two major islands - North and South - together about 1,600 km in length and similar size to Great Britain or State of Colorado.

The North Island is the smaller of the two major islands, and home to the country's debonair capital, Wellington and the country's largest and most cosmopolitan city, Auckland. The northern areas of the North Island enjoy a sub-tropical climate and a variety of landscapes. The centre of the island is primarily a volcanic landscape with vast forests, volcanic peaks, and picturesque lakes, rivers full of trout and peaceful riverside settlements surround *marae* (Maori meetinghouses). The eastern side of the island is covered with vineyards. Cape Reinga, the northernmost point of the North Island, is where the Maori believed their souls, in their afterlife, depart for the long journey back to their mythical ancestral land, Hawaiki.

The South Island, though less populated, is the larger of the two major islands of New Zealand. It is full of breathtaking natural sceneries. The variety of its geological repertoire is astonishing; from mighty glaciers to subtropical rainforest, snow-capped mountain to sandy beaches; alpine passes to serene lakes, beautiful fjords to fertile plains, mysterious caves to friendly coastal towns, the opportunity for enjoying the great nature and adventure are endless.
